# Box O' Boxes

whacked.l0pht.com

This document is about fraudulent fone add-ons.
This is based on Boxes 1.0, but Box O' Boxes contains
a few more boxes (Most of them are pretty sucky).
The basic guidelines for the schematics are:

G= Green wire

R= Red wire

*= Female jack

\= SPST switch

O= Connection

@= Gator clips

-= Wire

!= Wire

(Taken from the DLOC box)

Also if you are new to phreaking, you will notice that most words with "f" in
them are swapped with "ph" and vise-versa.
eg.    "Telefone" or "Phile"

This phile was not written by anyone who has anything to do with the
Whacked Mac Archive (Except Down/Up-loading).

There are quite a few more boxes than the ones in here, they will be added in
a few weeks.

There is also a part of this doc called Gadgets, which is not a box, but just a
couple of fone gadgets.
