

\$\$\$\$\$\$\$\$\$=>Making Your Phone<=-\$\$\$\$\$\$

\$\$\$\$\$\$\$\$\$=>Into a Cheesebox <=-\$\$\$\$\$\$

/=\Typed by:Sir Knight/=

A Cheesebox(named for the type of box the first one was found in)is a type of box which will, in effect, make your telephone a Pay-Phone.....This is a simple,modernized, and easy way of doing it...

Inside Info:These were first used by bookies many years ago as a way of making calls to people without being called by the cops or having their numbers traced and/or tapped.....

How To Make A Modern Cheese Box

Ingredients:

1 Call Forwarding service on the
line

1 Set of Red Box Tones

The number to your prefix's Inter-
cept operator(do some scanning for
this one)

How To:

After you find the number to
the intercept operator in your prefix,
use your call-forwarding and forward
all calls to her...this will make your
phone stay off the hook(actually, now
it waits for a quarter to be dropped
in)...you now have a cheese box...

In Order To Call Out On This Line: You
must use your Red Box tones and gener-
ate the quarter dropping in...then, you

can make phone calls to people...as far
as I know, this is fairly safe, and
they do not check much...Although I
am not sure, I think you can even make
credit-card calls from a cheesebox phone
and not get traced...

Enjoy, and don't get Caught!
