

ell, here it is. My first issue of C.H.A.O.S. Hope you like it. I'm gonna try (<-keyword) to make this a kick-ass zine. New interface, different from other zines. I'm gonna try to include any apps that are talked about. If I dont include them you can find them yourself on the internet at any Hack/Crack site (Neverness!) in about 5 minutes. Oh and I'm also gonna try to make this one of those interactive thingys. So you, the members of the Hackintosh Community, can write articles and send apps and your stuff and it can be most likey published in the next, or next after, or next after that, issue. Ok, now that I have blabbed you to death with all this shit, on with the show! Pick a link below.
