

Letter From the Editors

Welcome to another issue of EMC! After getting the first issue out the door in nearly a week, this looks to be more of a bi-weekly project than a monthly project. There's nothing better than spreading the information around several times in a month.

Thank you for taking interest in EMC Volume #6. As you can already tell, it has been given a complete makeover, as EMC will continue to be distributed in DOCMaker format from now on. This makes the issues more appealing, we can now include colored text, different fonts, and several graphics. The HTML version of this issue should be quite similar in appearance.

The emcCTCP nick will be floating around on IRC after each new issue release. Look for it in #macfilez or in its home channel, #emc. Otherwise type '/ctcp emcCTCP xdcc list' for a listing of available EMC issues.

In an effort to let everyone know what the new warez actually are, descriptions will be provided for as many files as possible.

If you have any suggestions or comments, please e-mail them to: freakman@altitude.firsttech.com. HTML versions of the issues will be developed when I get more time on my hands...and also when I can create a template for the HTML pages.

I will include any non-standard system fonts that are used in these issues for your convenience.

Thanks for reading!
