

Letter From the Editors

Greetings!

Welcome to EMC Volume #08. Our special feature for this issues will be on LAMENESS! I encourage you to take a look at the "Examples" section of lameness!

Other than the feature on lamness, some of you may find the articles on flooding somewhat interesting, however these are just preliminary, as volume 9 will have about 10 times the info included in this issue.

Aside from that, Happy Holidays!
