

Greetings! We've now moved our website to <http://www.ntbbs.org>, make sure to bookmark this!

There are no warez listings in this issue of EMC, however Volume 11 will have a listing again.

We've got a few reviews on software and games in this issue, but the big focus is the FloodFAQ. The FloodFAQ is too big to be included in this actual issue, so I've created a spot for it on our server. It will continue to be updated at this url, and I'll make sure everyone knows when new versions of it are ready. There is also a huge feature on [A[narchy 1.x, an Ircl script written by Plugs, check it out!

Other than that, this issue is small and just to let you know we've started working on Volume 11 already, and that should be out the first week of March.

And now, we present to you EMC Volume #10.
