This is the frontpage of MacAddict Hacker.

Try Before You Buy

Includes codes and icons of all the cool software in the folder marked "Try Before You Buy" in the MacAddict CD. Very useful for when your too lazy to download the software.

Software

We wanted to include hacks and serial numbers on the files located in the "Software" folder on the MacAddict CD. Again this is great to use the software from the cd rather than wasting bandwidth.

Cracks and Numbers RIP? Not Exactly.

What ever happened to Cracks and Numbers and Hackers Helper? We have the real answers why you cant get it anymore and why it happened.

Reviews

Software reviews from pirates who know software better than anyone else. This month we are reviewing Codebook 3.0. A book of game cheats and codes. Also hints to finish games.

Thanks

For all the people who helped make this issue of MacAddict Hacker.

Letters

People send us letters and opinions, and we print em. Very simple.
