)))))))))intro(((((((((((((((((((

welcome to __the MIDNIGHT RAID__
in this zine i intend to include every file, list, and sensitive document i can get my hands on.
__if you have something, send it--- i will include it (unless it REALLY sucks)

i am not out to compete with "the rest" of the mac zines. this is meant to be distributed to
all platf0rms and be sort of "we'll print anything and everything". send us anything and it
gets in either to be informative, or just be there so peeps can hear your opinions/stories.

i'd appreciate stories about your phreaking/hacking/anything else experiences..that doesn't
necessarilly mean tech...just what you've done (although tech is good too)...submit under
any name...

I dont know how i will distribute this yet. give me feedback. email? get an hlserver? just
upload it everywhere?....
