

untraceable (somewhat)

you will probably need to hide your identity when you are on the internet for some reason or another. this file explains some of the obvious.

-never hack from your own account

[to get other accounts:

1--call an isp. get their guest account (you have your ways of doing this i hope). remember: register w/false info. dont register over your home phone line.

2--d/l someone's ppp prefs if you hack some box somewhere

3--ask peeps you know.]

-spoof/bounce your ip

[1_wingates

port scan 1080 and find yo'self a wingate (always TCP)

or just ask someone for one..
