

Software Dynamics

Product Information

Enter the world of multimedia with innovative software products from Software Dynamics, now running under Windows 95!

Whether you want to

- create multimedia presentations
- or create your own video productions
- view your favorite Photo CD images

you'll find the software to suit your needs. A complete range of complementary software is available to make working with video, graphics, sound and animation a true multimedia experience!

All software products from Software Dynamics are extremely intuitive, easy to use and fast to learn. Multiple language versions are provided on one CD for your convenience.

More detailed information about each software product is given below.

MediaMaestro

- Multimedia Presentation Software -

Software Dynamics announces their multimedia presentation software **MediaMaestro**, version 2.0.

With **MediaMaestro** you can create full-featured interactive multimedia presentations for personal, business and home office use. Make impressive presentations containing video, animation, images, text, sound and music.

MediaMaestro is intuitive and easy to use. The 'drag and drop' interface lets you put stunning presentations together in just minutes. Interactive presentations can be created for use in point of sale, training etc.

Standard business presentations can be made more interesting by adding video sequences and still images along with text, sounds and music. Video formats supported include AVI, FLI/FLC, MPG* and DAT* (Video CD) *(requires an MPEG playback board). Image formats supported are BMP, TIFF, PCX, GIF, JPEG and Photo CD. Sound and music files in WAV, MIDI and CD Audio format can be added to presentations.

A flexible text function, screen underlays, transition effects, pre-defined templates and backgrounds, ready-made sample presentations as well as a complete media clip library are included in **MediaMaestro**.

The software can be installed in 4 languages - English, German, French and Spanish. A license-free run-time version of **MediaMaestro** is provided for distribution with presentations.

VideoMaestro

- Powerful tools for creating and editing digital video -

VideoMaestro is a collection of powerful tools for capturing, creating and editing digital video. Tools such as a video capture program, a video editor, a logo generator, a morph program and a media manager are included.

The software is extremely easy to use and can be installed in either English, German, French or Spanish.

The following applications are included in *VideoMaestro*:

Video Capture
Video Editor
Video Logo Generator
Video Morph
Video Screen Saver
Media File Finder

Video Capture

The *Video Capture* program lets you capture and digitize video from a variety of video sources, such as a video recorder, onto your hard disk. All video capture boards which are delivered with a Video for Windows capture driver are supported (such as boards from Creative Labs, Aztech, Miro, FAST, SPEA etc.).

The resulting AVI video file can then be played back in any applications supporting the AVI format (i.e. *MediaMaestro*) or edited using the *Video Editor* software.

The software is extremely user-friendly and intuitive. Setup options such as the video size, color depth, compression rate, frames per second etc. can be made in one dialog box. Click on the *Start* button to start recording and the file will be stored on your hard disk in the AVI file format. A preview function is also provided for playback of the recorded video.

Video Editor

With the *Video Editor* you can edit, splice, add sound or titles to video files. New videos can be created using existing video, animation, image and sound files. Spectacular videos can be created for desktop presentations (e.g. *MediaMaestro*) and home video productions.

The easy-to-use 'drag and drop' interface lets you put your video together in the Construction Window in just minutes. On the File Selector window you can preview all supported file types on a thumbnail view before dragging and dropping selected files onto the Construction Window.

The files are then organized on a time line to accurately define the sequence of events in the resulting video. Existing video files (AVI, FLI/FLC) can be edited to cut out unwanted frames; sound (WAV) files can be edited to adjust their duration and more than one sound file can be played at once during the video, thus 'mixing' the audio track (i.e. useful for playing music in the background with spoken commentary overlaid).

Image files can be inserted inbetween video sequences or two video sequences can be 'spliced' together to create a new video file. Transition effects can be used between the two video sequences to provide a smooth change-over from one video to the other.

An extensive Text function is provided for titling video clips. The font, size and color of the text can be selected and then the text block can be placed anywhere on the screen. The ability to create multiple text blocks allows for creative titling.

Flexible options are provided for previewing the newly created video sequence and for storing the final version in AVI format. The size of the video, color depth (256 or full color), compression and number of frames per second can be defined for the final AVI output file.

Multi MediaMaestro

- the affordable entry into the Multimedia world -

Multi MediaMaestro is the complete solution for all multimedia enthusiasts:

10 multimedia applications on one CD! Whether you want to create multimedia presentations or create and edit digital video, *Multi MediaMaestro* has the application for you.

The following software is included in *Multi MediaMaestro*:

MediaMaestro 2.0
Run-time Player (lizenzfrei)
Video Capture
Video Editor
Video Logo Generator
Video Morph
Video Jukebox
Video Puzzle
Video Screen Saver
Video Wallpaper
Media File Finder

Professional Photo CD Collection

- The perfect combination of high quality photographs and great software tools -

The **Professional Photo CD Collection** contains 100 professional royalty and license-free photographs in Kodak's Photo CD format from the well known German photographer Jochen Kallhardt. 4 themes are available - *Flowers, Farm Life and Animals, Four Seasons* and *Structures and Backgrounds*.

Also on the CD is the **Personal Photo CD Software Collection** including 6 great Photo CD applications which can be installed in 6 languages. You'll be amazed at what you can do with your Photo CD!

The following software is included on each CD:

Personal Photo Viewer

With the *Personal Photo Viewer* you can view, crop, export, print and create slide shows with Photo CD images. Load photos from the easy to use contact sheet in 5 Photo CD resolutions or export directly to Windows compatible file formats such as TIF, BMP, PCX and JPG (compressed). Use the integrated automatic slide show feature for a quick overview of your Photo CD.

Personal Photo Show

With the *Personal Photo Show* you can create multimedia slide shows incorporating Photo CD images, sound and text. The contact sheet provides a thumbnail view of images on the Photo CD for easy selection - just click on one to add it to the play list. Add a sound (WAV) or music (MIDI) file to accompany your photos or record your own commentary using one of the standard Windows tools available to personalize your Photo CD slide show.

Personal Photo Manager

The *Personal Photo Manager* is the ideal tool for organising and administering a Photo CD collection.

Photos stored on a Photo CD are automatically loaded into a database file and can be catalogued under a number of keywords. Flexible search options are available to locate a photo or a selection of photos in the database. All photos, or selected photos can be viewed as thumbnails on the contact sheet. Once the desired photo is selected, it can be transferred to the *Personal Photo Viewer* for viewing and exporting.

Personal Screen Saver

The *Personal Screen Saver* lets you display images from your Photo CD when the computer is not in use. Flexible options for setting up the screen saver such as size, image type, fade in, duration and password protection are provided.

Personal Photo Puzzle

The *Personal Photo Puzzle* lets you turn Photo CD images into desktop jigsaw puzzles. Load your favorite photo, select the number of puzzle pieces and the degree of difficulty or turn on the Hint option to help you solve the puzzle.

Personal Wallpaper Flipper

The *Personal Wallpaper Flipper* lets you create your own personal Windows wallpaper from Photo CD images. Photo CD images can be saved in the Windows BMP format and previewed for inclusion in the wallpaper list. And if you want to change the wallpaper while working in Windows, just double-click the Autoflip icon to flip through the selected wallpaper collection.

Ordering Information

To place your order for any of the above products, fill out the order form 'Order.wri' and send it to us today!
