

MusicScapes Professional
Produced Midi Mark Productions
Wayzata Technology Inc.

This fine collection of royalty free music is available for use in your multi-media presentations. Midi Mark Productions has worked with labels such as Aira Records, Megatone Records, Flow Records and Microsoft Corporation. The music has been digitally recorded with the industry standard Digidesign recording system. The audio IFF files may be used with popular programs such as Deck, Quicktime and other fine multi-media programs. The music is licensed to the purchaser for use in multimedia presentations with no additional fees. If this music is used for a commercial broadcast credit must be given at the end of the broadcast.

The music was all recorded at MIDI Mark Productions recording studio using synthesizers, samplers, sequencers, multi-track tape decks, and of course live musicians. The music was composed with the idea in mind that it would be used as background music in your presentations. Choose the music that creates the best mood for the message you are trying to convey. If the tracks are too long, use editing tools to shorten and fade out music. Be creative and have fun with these tracks.
