Thank you for purchasing MusicScapes Professional.

Quick Start for Windows Users:

- To install MusicScapes Professional:
- To install: Select "Run" from the Program Manager "File" menu.
- For command line type: CD-ROM drive letter:\INSTALL.EXE (example D:\INSTALL.EXE) and click the "OK" button.
- Now MusicScapes Professional should be installed.
Note:The installer does not copy any files to your hard drive or edit any of your setup files when it installs the software.
- Double click on the MusicScapes icon to start the program.
- Once MusicScapes is loaded, you will see the juke box, you are now at the main menu.
- You may use the juke box 2 ways, you can listen to the music and watch the slide show with it or you may listen to the music without any slide show. Default is to have the slide show on. To turn the slide show off click the "OFF" button once, to turn the slide show back on click the on button once.
- Play a song by clicking on one of the buttons.
- Return to the main menu from a slideshow before the song is completed by selecting "Return to Main" from the "Main" menu.
- Adjust the volume level up or down by using the "Volume" menu, the check mark will show you the current setting.
- Please note that when you are viewing a slideshow there is a menu with the name of the music track just to the right of the volume menu. This is merely to indicate the currently playing track.

Quick Start for Macintosh Users:

- Double click on the MusicScapes icon to start the program.
- Once MusicScapes is loaded, you will see the juke box, you are now at the main menu.
- You may use the juke box 2 ways, you can listen to the music and watch the slide show with it or you may listen to the music without any slide show. Default is to have the slide show on. To turn the slide show off click the "OFF" button once, to turn the slide show back on click the on button once.
- Play a song by clicking on one of the buttons.
- Return to the main menu from a slideshow before the song is completed by selecting "Return to Main" from the "Main" menu.
- Adjust the volume level up or down by using the "Volume" menu, the check mark will show you the current setting.
- Please note that when you are viewing a slideshow there is a menu with the name of the music track just to the right of the volume menu. This is merely to indicate the currently playing track.

This CD-ROM contains 16 full length audio files that offer a variety
of music styles. Some of the categories are rock, country, jazz,
new age and others on this CD (for more in depth information on this
please read the text file "A Midi Mark Read Me" located on the root
directory of the CD).

These sounds are full length audio tracks, they are too long in most
cases for system sounds. However with a sound editor they can be
edited into smaller segments. They are intended for use as background
music for Multimedia presentations ect.

The music on this CD is saved in 4 different sound file formats.
The formats are 44.1k stereo AIFF (ready to master for Red Book audio

CD tracks!), 22k mono AIFF (most popular with multimedia developers!), 22k mono System 7 sound format and 22k mono Windows .WAV format. This CD also has CD Audio tracks, you may play tracks 2 and up on your audio CD player.

These files are fully editable provided you have a program that edits audio files (example: MacroMedia SoundEdit 16). They may be used in productions provided credit is given and the production is not a duplication of the collection (example: Joe's Audio Tracks).

The music files are in directories/folders that have names corresponding to the format of the sound file. AIFF_44k, AIFF_22k, System 7 and Wave_22k.

If you have any technical questions please call our toll free Tech. Support line at 1-800-377-7321, we will be happy to answer any questions you may have.

We are always in pursuit of better products for you, our customers. If you have any suggestions or comments on how to improve this product please include them in the space provided on the registration or EMail us at WayzataTec@aol.com.
