

HOW TO MAKE MARIJUANA BETTER

THE ICE PACK PROCESS

GET A THICK CARDBOARD BOX WITH A GOOD LID AND FILL IT WITH DRY ICE. POUR THE MARIJUANA INTO THE BOX AND COVER IT TIGHTLY. DEPENDING ON THE OUTSIDE TEMPERATURE AND HOW MUCH DRY ICE YOU HAVE THE ICE SHOULD KEEP FOR A DAY OR TWO KEEP THE MARIJUANA WITH THE ICE MAKE SURE IT DOES NOT BECOME A LIQUID BUT TURNS INTO A GAS THUS THE MARIJUANA SHOULD NOT GET DAMP ALTHOUGH IT MIGHT. IF YOU CAN'T GET DRY ICE DAMPEN THE MARIJUANA AND PUT IT INTO A FREEZER. LEAVE IT THERE FOR A WEEK THAW AND DRY IT.

BLACK MERTA (SOMETIME CALLED "HAROLD'S DISEASE")

TAKE THE MARIJUANA AND PUT IT INTO A ONE-POUND COFFE CAN. ADD ENOUGH WATER TO MAKE IT SOGGY AND PUT THE PLASTIC LID ON TIGHT. PUT IT IN A DARK DAMP CORNER OF YOUR HOUSE AND LEAVE IT THERE FOR AT LEAST A WEEK. WHEN YOU RETRIEVE IT YOU'LL DISCOVER THAT THE MARIJUANA IS COVERED WITH A BLACK WEB LIKE FUNGUS. DRY THE MARIJUANA USING A HEAT LAMP AND MIX IT ALL TOGETHER THE MARIJUANA WILL BE AT LEAST TWICE AS GOOD.
