

Hi my name is John, with a \$5 investment and a little work, I made \$18,000 between 3 to 6 months (some have made more). I will share with you how I did it. If you would like to try your own methods and go straight to the program [click here](#). Some people have had success with other methods. My methods work, work, work! At first I must admit, I had a hard time making this program work but after giving up and trying again I solved the problem and here are the steps:

1. First you need to sign up for [AnyPay](#) to receive your payments twice a month [click here if you're online](#). Its free and they give you \$5 just like pay pal to join. Its the only service used for this program.
2. Now [click here](#) and review the program and sign up.
3. Now that you have signed up, lets promote okay! The more successful you are the greater success for all those in our group.
 - First promote your page by sharing it with friends and family.
 - Secondly, build a small page on free web service like [geocities.com](#) and promote it there. Add it to the major search engines.
 - Next share it on Morpheus, kaza, and all other Peer-2-Peer Programs. It can spread across the world easily there. You can do it in the form of an article or a short ebook page.
 - Here is a list of effective ways to promote your web page. I would suggest doing all three. There are more but I chose these as the better ones.
 1. [No more hits \(Get free traffic\)](#)
 2. [ExitBlaze.com](#)
 3. [StartBlaze.com \(This works well\)](#)

[Welcome to the \\$18,000 Program!](#)
