

The new world of e-Text

Welcome to the wonderful new world of e-Text! With its Acrobat 4.0 software shell, e-Text links page files of your textbook and study guide with each other, along with other valuable digital and online resources, to create a non-linear learning experience that's fast, effective and fun.

Because you are one of the very first to use this exciting new product, we're anxious to receive your input. On the main menu bar for each e-Text, you'll find a Feedback button. Please use this feedback feature, and use it often. We are always looking for new ways to enhance our products to better meet your needs. And the best new ideas usually come from people like you, the users.

Enjoy your introductory e-Text. And please, let us know what you think about it.

Sincerely,

Kevin Kane
Vice President, Editor-in-Chief
