

What you will need to make a cherry bomb:

1. Gun Powder
2. A ping pong ball
3. Cannon Fuse - the stuff found on good rockets. Approximately 3+ inches.
4. Needle, something thin and sharp
5. Nail Polish *OR*
6. Tape- Any kind of strong tape.

Instructions: Get the ping pong ball and poke a hole in it with the pin. Now, place as much gunpowder in the ping-pong ball as possible and then put the fuse through the hole. Place it in a safe place and light the fuse, then run.

Options: Cover the entire ball with nail polish and/or tape. This will give it an extra bang. Remember: This bomb is very flammable because after the explosion the ping pong ball will consume itself in flame. Recommended uses: Waking someone up. Dropping in a gas tank - very large explosion. Maybe a few iron bits in the ball - good shrapnel.
