written by: >=< Lord Omega >=<

Welcome, to the Lord Omega School of Beginning Terrorism. You will find that, in a v ery short time, terrorism is a fun an profitable caree r that almost anybody can do. First, we'll assume t hat you have no money. (After the cost of this class, you sure won't!) So, we'll start off cheap...

#### Chapter one: Dress to Kill

-----  
Clothing is a very important thing in a good terrorist. You will notice that all of the recognized pros (ie, Fidel Castro, Yasir Arafat, Alexander Haig) all have their own special styles. But the main one we will be talking about is the standard olive drab unifo rm since it is the most used. As I said, I'll prepare yo u with almost no money. What you will be supplied with is a pair of olive drab pants, jacket, and canteen. Anot her important article of clothing is the headband. Face it, when have you seen a convincing terrorist without one? (On that note, when have you seen a terrorist...couldn't resist ...dD) Some schools recommend a khaki one, but I prefer a nice shade of olive again. You must tie it around you hai r and let at least 4-6 inches of cloth dangle after you have tied it. Any less and you will be recognized as a beginner a nd will probably be immediately shot. If you put a lot mo re cloth on it, then other terrorists will think you are pr etentious and stuck up. Once again, you will probably be shot. For shoes, pretty much any brand will do in comba t boots, but don't get an expensive "Macy's" pair since peopl e will just laugh at you. Oh, remember: Make sure that all of the clothes are permanently soiled, and a little bit baggy.

#### Chapter two: Weapons

-----  
Let's face it, a good terrorist needs something to kill with, eh? You will be supplied w ith Army issue .45 caliber handguns at graduation, and a full bandoleer. This, however is only a temporary subs titute. You will need to get a better weapon, preferably som ething fully automatic and big, for that matter. Fitting nic ely in this catagory is the M-60. The gun can tear apart a building in seconds, and does wonders to enemies. (Think o f what it could do to Matt Ackeret! ...dD) The only proble m with it, is that it weighs about 53 pounds, empty. and ab out 63 lbs with a full banana clip. So, if you are a wimp, s tick with a smaller gun. The best way to get an M-60 is t o see someone who is carryi 1000 ng one and ask if you can borrow it. If he does not agree, kill him. If he agrees, kill h im anyway, because only a stupid terrorist would give som eone else his gun, and besides, he probably deserves to die a nyway.

#### Chapter three:Transportation

-----  
This is a short chapter. All graduates will be supplied with a plane ticket to either the Mid-East, or any of the Central American countries. When you get there, go and steal a jeep. I recommend jeeps for transports since they are fast, and so mewhat quiet. You can also mount your M-60 on a gun turret, and cut up pedestrians if you wish. Tanks are too difficult

to steal, and they have a tendency to kill you when you stand in the road to get them to stop. Jeeps are also very fuel-efficient. They will do about 20 mpg city, 15 in the jungle.

Chapter four: Which side?

-----

Well, it doesn't really matter which side you are on, as long as you get paid. That's what you came here for, didn't you? Terrorists tend to be paid best by the United States. But, it's been stated that Cherinkov is making the trade now very competitive. Who knows, in the future, he might be out-bidding the U.S...
