ITU-T RECOMMENDATION SUMMARY		
------------------------------	--	--

Rec. No. : D.103	Title : Charging in automatic service for calls terminating on a recorded announcement stating the reason for the call not being completed	
-------------------------	---	--

Study Group : III - Tariff and Accounting Principles		
---	--	--

Version : Revised	Date of adoption : 1992	Notes :
--------------------------	--------------------------------	---------

In the international automatic service it is desirable for calls terminating on a recorded announcement provided by an Administration stating the reason for the call not being completed such as:

- suspended, cancelled or transferred subscribers;
- network failures;
- changes in the numbering plan of the area/country;
- network management actions;
- congestion in the network;
- other reasons of a more general nature;

to receive the same treatment in different countries.

The CCITT considers that no charge should be made for these calls.
