ANNEX A

(to Recommendation I.113)

Alphabetical list of terms contained in this Recommendation[1]

201asynchronous time-division multiplexing
202asynchronous transfer mode
202ATM
209ATM deterministic transfer mode
235ATM statistical transfer mode
203block
212block header
204block payload
101broadband
205broadband access
206broadband communication channel
102broadcast
207cell
208circuit transfer mode
103connectionless service
104contribution
104contribution application
105conversational service
209deterministic
106distribution
106distribution application
107distribution service
108distribution service with user individual presentation control
109distribution service without user individual presentation control
110enhanced-quality television
111existing-quality television
210frame
211framed interface
212header

[1] The number against a term indicates its location in the vocabulary.
