ITU-T RECOMMENDATION SUMMARY	
------------------------------	--

Rec. No. : I.464	Title : Multiplexing, rate adaption and support of existing interfaces for restricted 64 kbit/s transfer capability
-------------------------	--

Study Group : XVIII - ISDN

Version : Revised	Date of adoption : 1991	Notes :
--------------------------	--------------------------------	---------

Restricted 64 kbit/s transfer capability is defined as "64 kbit/s octet structured capability with the restriction that an all-zero octet is not permitted".

Recommendation I.464 sets out the special conditions applicable to Recommendations I.460, I.461 (X.30), I.462 (X.31), I.463 (V.110) in case of restricted 64 kbit/s transfert capability.

It introduces also the HDLC inverted mode for restricted transport capabilities.
