ITU-T RECOMMENDATION SUMMARY

Rec. No. : Q.785	Title : ISUP protocol test specification for supplementary services	
Study Group : XI - Switching and Signalling		
Version : New	Date of adoption : 1991	Notes :

Recommendation Q.785 contains a detailed set of tests for the supplementary services supported by Signalling System No. 7 Integrated Services Digital Network User Part (ISUP).

Details of the supplementary services supported by ISUP can be found in *Blue Book* (1988) Recommendation Q.730. It should be noted that the test Recommendation Q.785 covers those services which can be regarded as stable and clearly specified in *Blue Book* (1988) Recommendation Q.730.

Recommendation Q.785 also covers supplementary services supported by Recommendation Q.767.

The basic rules for the test specification can be found in Recommendation Q.780.

To order the complete text of this Recommendation, please use the Order Form for ITU-T Recommendations. An electronic version of this form is available on ITUDOC (Winword 2.0: UPI=ITU-5265; ASCII: UPI=ITU-2488)
