

Bits and Pieces (Bits3.tbk, Bits.doc)

This Toolbook is a series of animations illustrating various basic biochemical topics. These include:

Protein Biosynthesis

Membrane fluidity and active transport coupl to ATP hydrolysis

Immunoglobulin structure

The role of albumin in fatty acid transport

The important features of the citric acid cycle

The important features of electron transport and oxidative phosphorylation

Glucose - the straight chain - pyranose ring transition

Dr J M Basford, Department of Biochemistry, University of Wales, Cardiff
