CARDIOVASCULAR TUTORIALS

This CAL program (Cardiol.tbk) and its associated files (CVhelp.tbk & BMScalc.tbk) were authored at the Department of Biomedical Sciences (Marischal College, University of Aberdeen, Aberdeen AB9 1AS) using the Windows based authoring package Asymetrix ToolBook.

The files can be downloaded from the directory \public\physiol\cvtutor

It is designed to operate using the following directory structure. If the directories are not present in your directory tree it is advisable to create them and transfer the appropriate files to their proper directories. (Please note that the scripting allows use on a network so that they may be used on other drives provided the directories and subdirectories containing the appropriate files are present.)

C:\ToolBook\Work should contain Cardiol.tbk

C:\ToolBook\Work\Utl should contain the CVhelp.tbk and BMScalc.tbk files

The Tbk files are password protected and the password is **fred** so you can alter them to suit your own circumstances. All that we ask is you acknowledge any use you make of the material and send us any comments, improvements or suggestions.
