

# GATC - a Tool for the Study of computational Genomics

Dr Henry Keil  
Department of Biological  
Sciences  
Brunel University  
e-mail: [henry.keil@brunel.ac.uk](mailto:henry.keil@brunel.ac.uk)

## **Project aims**

- To introduce the learner to the content of several genomic and proteomic databases
- To employ a task - based learning approach to facilitate a deeper understanding

## **Project outcomes**

- Generation of a Web - site facilitating the study of Computational Genomics
- Fostering a critical analysis of molecular data retrieved from relevant databases
- Application of Bioinformatics tools in Human Genetics and Genomics

Further details about the GATC are available from  
<http://www.bioscience.heacademy.ac.uk/projects/tdf/keil.htm>
