Online Software for Self & Peer Assessment of Text-Based Exercises

Richard Parsons
Centre for Learning and
Teaching, University of Dundee,
01382 344265,
r.parsons@dundee.ac.uk

Project aims
- Develop a system to allow online self & peer assessment of text by students
- Create web-based authoring system to allow tutors to create self & peer assessment exercises
- Ensure the system is secure and anonymous in operation

Project outcomes
- Online software for tutors to develop self and peer assessment exercises
- Instructions, help and examples to illustrate how the software can be used
- An online system that allows students to assess their own and their colleagues work, and communicates their assessment by email and text messages

Further details about the Self & Peer Assessment project are available from http://www.bioscience.heacademy.ac.uk/projects/tdf/parsons.htm The software is now available to support innovative approaches to learning and teaching
