

Emerging Infectious Diseases Tutorial Preliminary worksheet

Name: _____

Assessment for this tutorial will derive from the notes you have prepared (5 marks), and the answers to these simple questions (5 marks), which relate to your notes and to the video you watched.

1. In the video, what was the name of the disease described in the case study?
2. What type of microorganism was it?
3. What was the carrier of the disease?
4. Give two additional examples of diseases transmitted from animal to human.
5. What reasons were given for the emergence of the disease?
6. What was the name given to a similar disease described in London in Tudor times?
7. Name 6 diseases which are deemed to be 'emerging'
