A photograph of a dandelion seed head on the left side of the frame. The seed head is green and has many white, feathery seeds blowing away from it, scattered across the clear blue sky. The seeds are in various stages of being blown away, some are still attached to the head, while others are floating in the air.

Promoting enquiry and active learning through project work

Dr Maria Chamberlain,
School of Biological Sciences, University of Edinburgh

Agenda:

1. Educational philosophy
2. The website
3. Types of projects
4. Logistics, timetabling and assessment
5. Evaluation

The Biosciences Project Inventory

- http://sbsweb2.bio.ed.ac.uk/group_projects/node/24
- Or Google: Biosciences, project, inventory

Types of projects:

- Field and lab-based

- “Find-out-about”

Topics of projects

- Biodiversity, conservation and management
- Environmental effects of anthropogenic activities
- Human nutrition, food supplements and hygiene
- Agriculture and animal welfare
- Medical and social issues

Each project entry includes:

- Project Description
- Research Guidance
- Starter References
- Additional information
 - Safety issues
 - Contact details
 - Gallery links

Logistics of the exercise

- About 30 of the listed projects are offered each year.
- Students are divided into groups of 4-6.
- Each group submits a shortlist of 4 choices from the list.
- Topics are allocated.
- Each student works independently to produce Outline Proposal and Literature Review – in which they must ask questions and suggest ways of researching them. They have 10 working days for this.
- Group Research (4 weeks)
- Oral Presentation
- Final Report

Group chooses project short-list (weeks 1 and 2)

Topic decided (week 3)

Individual submissions (week 5)

OPLR

OPLR

OPLR

OPLR

OPLR

And....Group Research
(Weeks 5 -9)

**Group Oral presentation
(Weeks 9 and 10)**

**Group final report
(Week 11)**

Oral presentation

- A staged debate
- A theatrical presentation
- Group effort: every one says their bit

**Refreshments
are served!**

Final report (one per group) to be modelled on:

OR

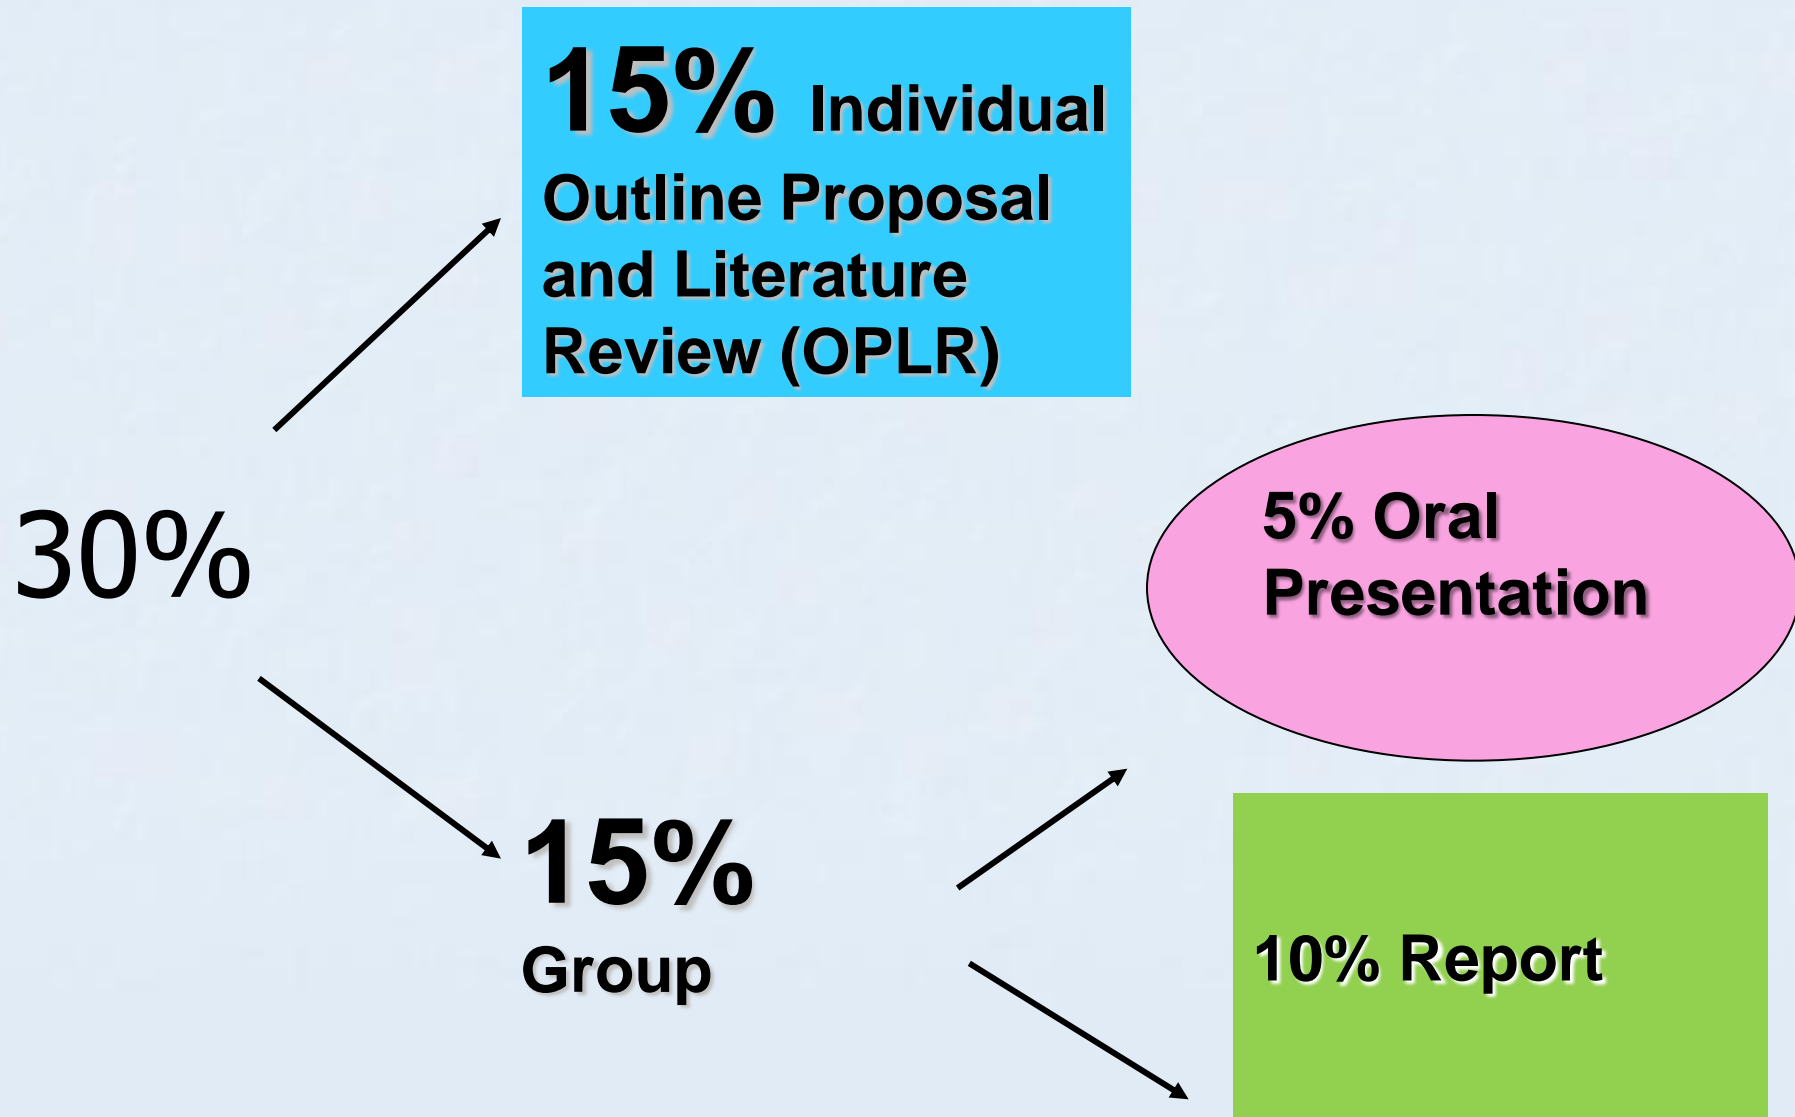

etc.....

Parliamentary Post Notes

Assessment

feast

REAL SuperDry

Fern sporebank at RBGE

Visit to a chicken rearing farm

Questions, not just answers

What employers want....

A degree on its own is not usually enough to get a job. Employers want students to demonstrate that, in addition to formal qualifications, they have the skills and qualities that they are seeking.

These skills would include

- self awareness
- taking initiative
- team working
- oral presentation skills
- interpersonal skills
- business acumen
- computer literacy

Some quotes:

- *"The group project was very interesting and it allowed us to bond with different people with similar interests and find out information for ourselves."*
- *"The group project was a great way of gathering together ideas and allowing students to express themselves or use their skills in a novel situation."*
- *"The best thing was the hands-on approach to learning through project work."*

....and some quotes from the contacts:

- *"We were very impressed by your students and particularly their level of knowledge and questions."*
- *"It was lovely to see you and your students today. They were such an impressive bunch! I had no idea we had been out so long."*
- *"Wow! They asked such searching questions!"*

Was the group investigative project educationally valuable?

Year	It was an excellent experience	Very much so	Fairly	A little	Not very	Total
2007	4	17	1	1	1	24
2008	31	14	2	1	1	49
2009	23	25	2	0	1	51
2010	22	39	8	1	1	71
2011	8	14	5	4	0	31
Total	88	109	18	7	4	226
