

*Positive feedback about the Centre's contribution to the ASSET project*

*"Dr Steve Maw from the HEA Centre for Bioscience was extremely helpful in reviewing the contents of the University of Reading's new website for staff, 'Engage in Assessment', which is a sister-site to the existing 'Engage in Feedback' resource. In particular, Steve's experience in producing pedagogic materials for staff has been incredibly useful in providing an objective analysis of the website's content to ensure it is both useful and engaging for staff. This type of objective support from the Centre is invaluable."*

Dr Anne Crook, Manager, ASSET Project, University of Reading
