# ABPersonViewControllerDelegate Protocol Reference

---

<b>Conforms to</b>	NSObject
<b>Framework</b>	/System/Library/Frameworks/AddressBookUI.framework
<b>Availability</b>	Available in iOS 2.0 and later.
<b>Declared in</b>	ABPersonViewController.h

## Overview

The `ABPersonViewControllerDelegate` protocol declares the interface that must be implemented by `ABPersonViewController` delegates.

## Tasks

### Responding to User Events

- `personViewController:shouldPerformDefaultActionForPerson:property:identifier:` (page 5) *required method*  
Sent when the user selects a property value of the person displayed in a person view controller. (required)

## Instance Methods

### **personViewController:shouldPerformDefaultActionForPerson:property:identifier:**

Sent when the user selects a property value of the person displayed in a person view controller. (required)

- (BOOL)personViewController:(ABPersonViewController \*)*personViewController* shouldPerformDefaultActionForPerson:(ABRecordRef)*person* property:(ABPropertyID)*property* identifier:(ABMultiValueIdentifier)*identifierForValue*

#### Parameters

*personViewController*  
The sender.

*person*

The person *personViewController* is displaying.

*property*

The property whose value the user selected.

*valueIdentifier*

When *property* is a multivalued property, the value the user selected.

**Return Value**

- YES if *personViewController* should perform its default action. Your application may quit as a result of this action.
- NO: if *personViewController* should do nothing. The delegate may perform custom action processing.

**Availability**

Available in iOS 2.0 and later.

**Declared In**

ABPersonViewController.h

# Document Revision History

---

This table describes the changes to *ABPersonViewControllerDelegate Protocol Reference*.

Date	Notes
2009-05-15	Removed preliminary document boilerplate.
2008-10-15	Added cross references. Added companion document.
2008-03-12	New document that describes the interface used to control the person view.
