EKAlarm Class Reference

Inherits from	NSObject
Conforms to	NSCopying NSObject (NSObject)
Framework	/System/Library/Frameworks/EventKit.framework
Availability	Available in iOS 4.0 and later.
Companion guide	Event Kit Programming Guide
Declared in	EKAlarm.h

Overview

An `EKAlarm` object represents an alarm in Event Kit. Use the [`alarmWithAbsoluteDate:`](#) (page 6) and [`alarmWithRelativeOffset:`](#) (page 7) class methods to create an alarm and use the properties to set information about an alarm.

Tasks

Creating an Alarm

- + [`alarmWithAbsoluteDate:`](#) (page 6)
Creates and returns an alarm with an absolute date.
- + [`alarmWithRelativeOffset:`](#) (page 7)
Creates and returns an alarm with a relative offset.

Accessing Alarm Properties

- [`absoluteDate`](#) (page 6) *property*
The absolute date for the alarm.
- [`relativeOffset`](#) (page 6) *property*
The offset from the start of an event, at which the alarm fires.

Properties

For more about Objective-C properties, see “Properties” in *The Objective-C Programming Language*.

absoluteDate

The absolute date for the alarm.

```
@property(copy) NSDate *absoluteDate
```

Discussion

If you set this property for a relative offset alarm, it loses the relative offset and becomes an absolute alarm.

Availability

Available in iOS 4.0 and later.

Declared In

EKAlarm.h

relativeOffset

The offset from the start of an event, at which the alarm fires.

```
@property NSTimeInterval relativeOffset
```

Discussion

If you set this value for an absolute alarm, it loses its absolute date and becomes a relative offset alarm.

Availability

Available in iOS 4.0 and later.

Declared In

EKAlarm.h

Class Methods

alarmWithAbsoluteDate:

Creates and returns an alarm with an absolute date.

```
+ (EKAlarm *)alarmWithAbsoluteDate:(NSDate *)date
```

Parameters

date

The date for the alarm.

Return Value

The created alarm.

Availability

Available in iOS 4.0 and later.

Declared In

EKAlarm.h

alarmWithRelativeOffset:

Creates and returns an alarm with a relative offset.

```
+ (EKAlarm *)alarmWithRelativeOffset:(NSTimeInterval)offset
```

Parameters

offset

The offset from start of an event, at which the alarm fires. Should be a negative value or 0.

Return Value

The created alarm.

Discussion

If *offset* is greater than zero, it is pinned to zero.

Availability

Available in iOS 4.0 and later.

Declared In

EKAlarm.h

Document Revision History

This table describes the changes to *EKAlarm Class Reference*.

Date	Notes
2010-03-25	New document that describes the class used to create alarms.
