Media Player Functions Reference

Framework:	MediaPlayer/MediaPlayer.h
Declared in	MPVolumeSettings.h

Overview

The Media Player framework defines several functions for use in displaying and hiding volume controls.

Functions

MPVolumeSettingsAlertHide

Hides the alert panel that controls the system volume.

```
void MPVolumeSettingsAlertHide();
```

Availability

Available in iOS 2.0 and later.

See Also

[MPVolumeSettingsAlertShow](#) (page 6)

Declared In

MPVolumeSettings.h

MPVolumeSettingsAlertIsVisible

Returns a Boolean value indicating whether the volume alert panel is currently visible.

```
BOOL MPVolumeSettingsAlertIsVisible();
```

Return Value

YES if the volume alert is visible; otherwise, NO.

Availability

Available in iOS 2.0 and later.

See Also

[MPVolumeSettingsAlertShow](#) (page 6)

Declared In

MPVolumeSettings.h

MPVolumeSettingsAlertShow

Displays an alert panel for controlling the system volume.

```
void MPVolumeSettingsAlertShow();
```

Discussion

The alert panel displayed by this function floats above the contents of the current window. It contains a slider for adjusting the system volume setting and a Done button so that the user can dismiss the panel. You can also dismiss the panel programmatically using the `MPVolumeSettingsAlertHide` function.

Availability

Available in iOS 2.0 and later.
