UIKeyInput Protocol Reference

Conforms to	UITextInputTraits
Framework	/System/Library/Frameworks/UIKit.framework
Availability	Available in iOS 3.2 and later.
Declared in	UITextInput.h

Overview

A subclass of `UIResponder` can adopt this protocol to implement simple text entry. When instances of this subclass are the first responder, the system keyboard is displayed.

Only a small subset of the available keyboards and languages are available to classes that adopt this protocol.

Tasks

Inserting and Deleting Text

- `insertText:` (page 6) *required method*
Insert a character into the displayed text. (required)
- `deleteBackward` (page 5) *required method*
Delete a character from the displayed text. (required)
- `hasText` (page 6) *required method*
A Boolean value that indicates whether the text-entry objects has any text. (required)

Instance Methods

`deleteBackward`

Delete a character from the displayed text. (required)

- `(void)deleteBackward`

Discussion

Remove the character just before the cursor from your class's backing store and redisplay the text.

Availability

Available in iOS 3.2 and later.

Declared In

`UITextInput.h`

hasText

A Boolean value that indicates whether the text-entry objects has any text. (required)

- (BOOL)hasText

Return Value

YES if the backing store has textual content, NO otherwise.

Availability

Available in iOS 3.2 and later.

Declared In

`UITextInput.h`

insertText:

Insert a character into the displayed text. (required)

- (void)insertText:(NSString *)text

Parameters

text

A string object representing the character typed on the system keyboard.

Discussion

Add the character *text* to your class's backing store at the index corresponding to the cursor and redisplay the text.

Availability

Available in iOS 3.2 and later.

Declared In

`UITextInput.h`

Document Revision History

This table describes the changes to *UIKeyInput Protocol Reference*.

Date	Notes
2010-02-25	First version of the reference that describes the protocol adopted by classes to enable simple text entry.
