SafariNamespace Class Reference

Technology area:	Safari Extensions
Availability	Available in Safari 5.0 and later.

Overview

The `SafariNamespace` class is a namespace that provides access to the Safari Extensions functionality outside of the web content area.

The corresponding class, `SafariContentNamespace`, is used from inside a web content area.

Tasks

Accessing Functionality

[application](#) (page 5)

The Safari application.

[extension](#) (page 6)

The current Safari extension.

[self](#) (page 6)

The `SafariExtensionGlobalPage` or `SafariExtensionBar` object that owns the DOM window that this instance of the `SafariNamespace` class was accessed from.

Properties

application

The Safari application.

readonly attribute `SafariApplication` application

Availability

Available in Safari 5.0 and later.

extension

The current Safari extension.

```
readonly attribute SafariExtension extension
```

Availability

Available in Safari 5.0 and later.

self

The `SafariExtensionGlobalPage` or `SafariExtensionBar` object that owns the DOM window that this instance of the `SafariNamespace` class was accessed from.

```
readonly attribute any self
```

Discussion

For example, the following is always true:

```
window.safari.self.contentWindow === window;
```

Availability

Available in Safari 5.0 and later.

Document Revision History

This table describes the changes to *SafariNamespace Class Reference*.

Date	Notes
2010-06-30	Minor editorial changes throughout.
2010-05-14	New document that describes a namespace class used to access to the Safari Extensions functionality outside of injected scripts.
