SafariExtensionContextMenu Item Class Reference

Inherits from	<code>SafariEventTarget</code>
Technology area:	Safari Extensions
Availability	Available in Safari 5.0 and later.

Overview

Instances of the `SafariExtensionContextMenu Item` class represent individual menu items within an extension's context menu.

Tasks

Setting Up a Menu Item

`command` (page 5)

The command identifier that the context menu item sends when activated.

`disabled` (page 6)

A Boolean value that indicates whether a context menu item is disabled.

`identifier` (page 6)

The unique identifier of the context menu item.

`title` (page 6)

The title displayed in the context menu.

Properties

command

The command identifier that the context menu item sends when activated.

attribute `DOMString` `command`

Discussion

Setting an empty string, `null`, or `undefined` has no effect.

This attribute is optional; the value defaults to the value of `identifier`.

Availability

Available in Safari 5.0 and later.

disabled

A Boolean value that indicates whether a context menu item is disabled.

attribute boolean disabled

Discussion

Disabled menu items are not displayed in the context menu.

Availability

Available in Safari 5.0 and later.

identifier

The unique identifier of the context menu item.

readonly attribute DOMString identifier

Discussion

This attribute is required.

Availability

Available in Safari 5.0 and later.

title

The title displayed in the context menu.

attribute DOMString title

Discussion

This attribute is required.

Setting an empty string, `null`, or `undefined` has no effect.

Availability

Available in Safari 5.0 and later.
