## **Introduction**

ClipboardPlus is a utility that keeps your text that was cut or copied. Eventhough ClipboardPlus does not save bitmaps, metafiles, etc., you can still cut and copied those object to the clipboard. This application is must for developers and heavy word processor users alike. Enjoy!

## Using ClipboardPlus

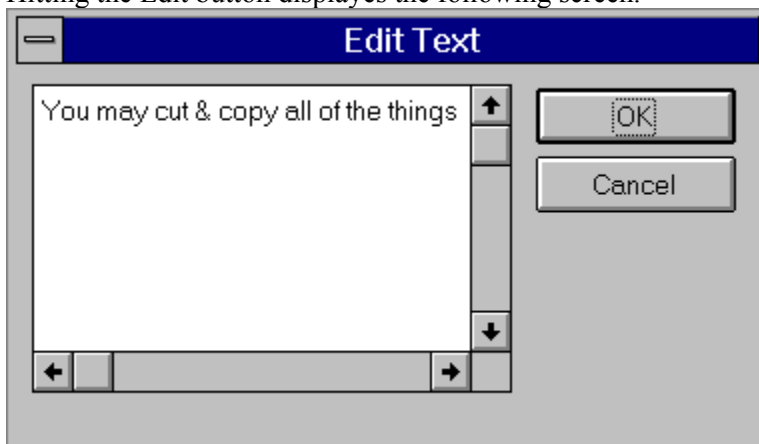

Start the application like any Windows application. It will automatically run minimized. Now, everything is ready for use.

When you maximize ClipboardPlus, the following screen is displayed.

Select a line in the listbox. You will notice that the three buttons will be highlighted indicating that they can be used. Selecting the copy button places the selected line on the clipboard so you can paste it into another program. (Double-clicking a line also copies it to the clipboard so you can paste it into another program.)

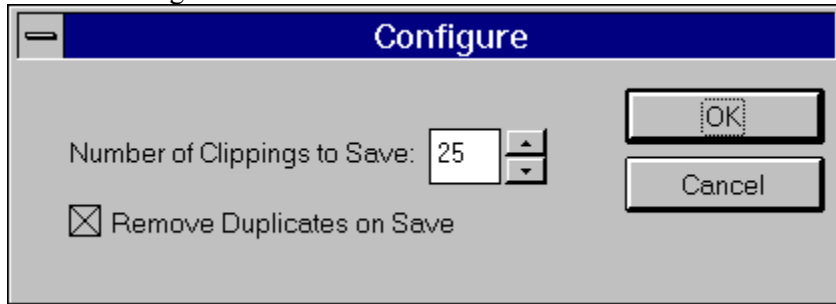

Hitting the Edit button displays the following screen.
