

# MacAssistant Tips and Tutorial Newsletter

## How To Subscribe

There are three ways to subscribe.

1. Check
  2. Online with a secure web page (credit cards)
  3. Use the enclosed Register application.
- 

### Check

I prefer checks over credit cards since I must pay processing fees to accept credit cards. In order to be fair to everyone, I am not charging more for those that wish to use credit cards.

Subscriptions via checks should be mailed to the following address:

MacAssistant  
PO Box 94  
Frankfort, KY 40602

To pay by check, open the newsletter and print the order form that is in the last chapter. Mail it to the above address with a check for the correct amount in US Dollars. When paying by check, I can only accept US funds. No foreign currency please. If you would like to pay with foreign currency, then you must use one of the options below when subscribing.

---

### Online with a secure web page (credit cards)

You can go to the following URL to pay with a credit card. This is a secure server connection that will encrypt the data you submit for your protection.

<http://order.kagi.com/?!8&S>

If your web browser has problems when working with secure connections there is a non-secure web page also. I recommend that the secure page be used if possible. The non-secure URL is:

<http://order.kagi.com/?!8>

These orders along with the subscriptions processed with the Register application discussed below are processed by Kagi. This is a well known company that processes payments for many shareware authors.

---

### Register application

You can also use the enclosed Register application. Using the register application, you can submit your subscription info via email, FAX or snail mail. If you desire to pay by check in US Funds, please print the subscription form from the Newsletter and mail it to the address at the beginning of this document.

Open the application and fill in the appropriate selections for the newsletter subscription that you desire. Make sure you select the correct form of payment from the pop-up menu in the lower right corner of the programs window. After everything is filled in, you can select the copy button to copy all of the information to the clipboard where it can be pasted into your email software. You can also print or save the information so it can be mailed or sent via FAX. The addresses and phone numbers will be included in the output generated by the Register application.
