After the unsuccessful colonial revolt, the British colonies in the New World were organized into the United States of Canada. In time, this vast and peaceful nation grew to include the entire North American continent. One of its most famous heroes was the Cisco Kid of the Royal Canadian Mounted Police.

Strange reports were coming in from prospectors in the Yukon. A new animal had been seen, a swift, elusive beast which the miners called a mouse-cat.

What made the reports so remarkable was the news that the mouse-cat, unique among mammals, had three ears.

"Mouse-Kitty" by Rick Norwood, from 100 Great Fantasy Short Short Stories, page 244.

The Cisco Kid was sent to investigate.

The Cisco Kid returned from the Yukon empty-handed. The mouse-cat had proved too shy and clever to be captured. He had, however, observed the little animals closely, and he could vouch for the fact that they had not three ears but four!

The controversy was referred to the Science Court, and in short order they handed down a verdict in favor of bilateral symmetry. "For," said the Chief Justice, "Who are we to believe, the three mouse-cat ears or the count of Mounty Cisco?"

4 point

The lazy brown nematode crept over the jaundiced trilobite. Sadly, the aged fossil remained powerless despite the ugly worm's slimy advance over his noble, crystalline features. Yes, even the basest of creatures face the horrible, inexorable onslaught of progress. Time wages her exacting war without passion or pity.
