

Euro: Declaration of War!

David Ben-Ariel

The dollar's days are numbered! GERMANY has pushed its economic plan for Europe through Brussels (Rev. 13:17). The Euro's scheduled launch date is January 1, 1999. Not only does this *ACT OF WAR* pose a threat to America's financial standing, it will also imperil the United States' political power. German hegemony continues unrelentlessly, as Europe covets the position of "leader of the free world."

As America's on the way down and out, Europe's on the rise and circles overhead like an eager vulture. As we go further into national debt and disgrace, instead of turning to God for divine assistance, we turn to foreigners for loans! (Deut. 28:44). But it'll be our downfall! Will Europe offer to bail us out? Japan keep us afloat? Or will they forcibly put us into receivership? Throw us into debtor's jail? REQUIRE FORCED LABOR? Who hasn't heard of loan sharks or how they fly into a frenzy over blood-money? Germany won't just break our bones, they'll bomb our cities!

"O House of Israel, why will you die?" (Ezek. 18:31). As America foolishly trusts Germany for loan guarantees, and Israel blindly falls for European pledges of peace and security, we'll both find ourselves short-changed and betrayed (Hos. 5:13).
