

Newton Fax Modem Card: Description

Article Created: 15 November 1993

TOPIC -----

This article describes the Newton Fax Modem Card.

DISCUSSION -----

The Newton Fax Modem Card is a PCMCIA-based data/fax modem. It has all the features and functionality of the external Newton Fax Modem, but is built into a type II PCMCIA card.

The Newton Fax Modem Card communicates data at 2400 bits per second and sends faxes at 9600 bits per second. It's compatible with the Hayes AT command set, Group 3 fax standard, MNP 2 and 4 error correction, and V.42bis and MNP 5 data compression.

The Newton Fax Modem Card can be inserted into the Newton MessagePad and allows users to send faxes or communicate via NewtonMail and other online services.
