

This directory contains some video drivers that have been tested and are known to work with the game. They are provided as a convenience for users who don't have easy access to updated drivers.

Subdirectory Contents:

Alliance - ProMotion 6410

Ark - 1000PV and 2000PV chipsets

ATI - Ver. 2.22 Mach64

Avance - Avance Logic 2302 chipset

Diamond

 Stlth64V - Ver. 4.02.325 Stealth64 Vram 3000 series

 Viper - Two Alpha and Beta drivers that do work with some Viper and Viper Pro cards.

Matrox - Ver. 3.14 drivers for Millennium and Mystique

Spider - Driver for Spider Lynx64 using Integraphics IGS 1680 chipset. Has also worked with other makers' cards using IGS 168x chipset.

Trident - Ver. 3.01 drivers for Trident 93xx, 94xx, and 96xx chipsets, and a newer beta version driver.

In most cases there are specific instructions with each driver set for proper installation. If you experience problems installing your drivers or there are no instructions with your driver set, the following steps will work with most drivers.

Click on the **START** button

Go to **Settings/Control Panel** and Click

Double-click on **Display**

Click on the **Settings** tab

Click on the **Change Display Type** button

Click on the Change button next to Adapter Type

A list of compatible video drivers will be displayed.

Click on the Have Disk button and select the subdirectory containing drivers for your video card.
