## Rules of the Game

The game consist of a number of rounds. At the begining of a round each player stakes \$20 at the Bank. Then cards are dealing among three players. Each player, moving clockwise around the board, selects a card to play in the following order:

- The Nine of Diamonds is played the first;
- Then are played the Eight or the Ten of Diamonds, or Nines of other suits;
- Further, nearest ranking card in the suit for all played Nines. An Ace placed at most right side and a Six at most left side.

If a player do not have suitable card (e.g You cannot play a Queen if a Jack of the same suit is not played yet, etc.), he must pass lead and deposit \$10 at the Bank.

The round is over when one player has played all his cards. This player is winner. His takes all money from the Bank. Further, players begin next round. The Game is over when one or two players become bankrupt(s).

## How to Play the Game

To start the Game You must register as a member of Nine Club. First, You can see the following:

- the list of members of Nine Club, including ten names and corresponding accounts;
- the Control Panel with five buttons.

For more information about buttons on this Control Panel, move the mouse over the graphic. When the pointer turns to a hand, [click](#) to display information in the pop-up window. Alternatively, press TAB to highlight an area on the graphic, and then press ENTER.

Club members take positions at the list in order to decrease their accounts. New member takes free position (if it exists). In other case, new member merge the member who has the fewest account. The last one is excluded from Nine Club. Also is excluded a member who do not have money on his account. The **F5** button (or the left button on Control Panel) is not active until You is not registered. To register press **F8** (or the righth button on Control Panel). Next, You must enter or [click](#) (if Your name already in list) Your name and then enter password. Further, Your name is placed at the Nine Club member list and You get initial account \$200. So, button **F5** become active.

After You pass registration You can see the following:

- game table (in the center);
- You opponents on left and right side (both played by computer);
- the banker on top side.

The banker does the following :

- deals cards;
- collects money into the Bank and pays money;
- checks validity of all moves.

To make a lead You need to [click](#) an appropriate card. To interrupt the game press Esc. In last case You lose \$200. You must play until finish.

So, Play and Win!

[How to customize Environment](#)

# Nine

## How to customize Environment

Program allow You to customize game environment and save settings on disk. For this purposes choose **Save Settings** from **Options** menu. Also You can save game window position on desktop and, of course, results. Format of file of results is fully compatible with one used in the game version for DOS and also named NINE.RES. All settings are saved in file NINE.INI.

A few words about sound. All sound effects are stored in WAVE format and use standard MS Windows™ drivers to playback.

# Nine

## Problems

There are some problems that maybe or maybe not occur when you will run the game.

**BWCC.DLL not found.** This file had to be copied from distribution disk to MS Windows™ System directory. Another message can be displayed, "Program Manager could not find file or its components".

**Not enough memory.** There are exist three following decisions: first - terminate currently unused applications; second - if you use 256 color video mode now, change to 16 color mode because graphics resources for this mode need less memory; third - install additional RAM chips. Another good idea to remove large wallpaper (if any used) from Control Panel/Desktop.

**Some "snoring" sound when balls appear.** This happens when some 16-bit wave drivers are used. Sorry, but we can't help you because it's Microsoft problem or third party vendors.

**Panel looks like damaged.** Program does not support 1024x768 large fonts. Use another VGA or 8514 fonts.

*Nine*

## Credits
