Welcome to the People at Leisure CD-ROM from Gazelle Technologies, Inc.

This disc contains 240 pictures of people in leisure activities. The images are organized into various categories for easy access. Some of these categories include   water and sports activities, babies, families, teens, seniors, and more. Each of the 240 images are stored in 24-bit TIFF, 8-bit PICT, and reduced size 8-bit PICT formats. The files can be accessed directly through the folders, or preview and copy from within the browser. To quickly learn how to use the browser simply launch the browser stack and click once on the "?" button. This will take you to a screen of short tutorials that explain how to use the browser.

The HyperCard stack, "People at Leisure" was written with HyperCard 2.1. If you double click on the People at Leisure Browser stack, it will automatically use HyperCard 2.1 from the CD-ROM. If you have an older version of HyperCard on your hard drive you may wish to update it from the one on the CD-ROM. HyperCard 2.1 can be found in the HyperCard folder located in the Tools folder on this disc. Note that HyperCard 2.0 requires System 6.0.5 or later in order to run correctly. Also included on this disc are the graphic programs PhotoShop Try-Out, and GIFverter. You may use them to display the images. Photoshop is a complete working version except for the save and print options. This CD-ROM and the HyperCard interface are compatible with System 7.0 and support Balloon Help.
