1. Features

This manual is for S3 best quality AGP bus VGA card. The functions and specifications describe as below.

1.1 S3 Trio3D2X (362) and Trio3D2X+(368) Features

High Performance Integrated 2D/3D Graphics and Video Accelerator

- 64-bit 2D/3D graphics engine
- 4MB SGRAM or **8M SDRAM (368 only)** on board
- Integrated 230MHz RAMDAC with gamma correction
- Integrated clock synthesizers
- 66MHz AGP pipelined DMA mode
- 133 MHz AGP support

S3d Graphics Engine

- High performance 2D acceleration
- Flat and Gouraud shading for 3D
- High quality 3D texture mapping

Perspective correction	Panel Type	Resolution	SW[4:1]
Bi-linear and tri-linear texture filtering. MIP-Mapping. Depth cueing, fogging, alpha blending. Video texture mapping. Z-buffering. Glueless 133MHz AGP Support AGP DMA mode for highest performance 3D rendering Bus mastering for high performance video capture and display list processing PCI Power Management Glueless Video Digitizer Interface Support industry standard video digitizers decoders Odd/even field detection S3 Streams processor Technology Supports on-the-fly stretching and blending of primary

1.3 S3 Savage 3D(391) Features:

BUS TYPE: 64bit AGP 2X Side bands 133MHz BUS

CHIP SET: S3 Savage 3D

Memory Size: 8MB SGRAM / SDRAM

2D / 3D Graphics Accelerator

Enhanced 128 bit Graphics Engine.

Integrated 250MHZ RAMDAC , supports resolutions and refresh rates up to 1600 x 1200 (85HZ)

Leading 3D Performance with the highest image quality.

Triangle setup engine delivers 5M triangles / sec

Peak performance rates of 125M pixels / sec with all features enabled

Complete 3D feature set

Triangle Setup Engine.

Single pass Tri-linear Filtering

S3 Texture Compression

True Color Rendering

Void & Cluster Dithering

Spectral & Diffuse Shading

Alpha Blending

16/24 bit Z buffering

Vertex and Table Fog

MPEG-2 Video Textures

Palletized Textures

8KB Texture Cache

Edge Anti-Aliasing

Perspective Correction

Alpha Test

Multiple Textures

Procedural Morphing

Texture Morphing

Reflection Mapping

Shadows

Optimized SW DVD Solution(Optional)

Mpeg-2 acceleration features reduce CPU utilization and provide high frame rates.

Motion Compensation

Sub-picture blending and highlights

Planar to Packed Conversion

Support image quality

Filtered down scaling of host data

Complete Video Feature Set

YUV Planar to Packed Format Conversion

HW Sub-picture Blending and Highlights

Motion Compensation

Front-end Scalar with high quality Downscaling

Advanced Pixel Formatter for Multiple Video Windows

Advanced Streams Processor with Enhanced Scaling Algorithm

Bus Mastering of IDCT Data for SW DVD Playback

De-Interlacing Filter for Bob & Weave.

Independent Color Adjustment

3-tap Programmable Flicker Filter & Vertical Overscan Compensation

Integrated NTSC/PAL Encoder with S-Video, AV connector Support

S3 391 TV OUT SELECT

**If you want to select TV OUT, you must set the resolution at 640X480 mode.
(NTSC/PAL are same)**

2. Hardware Installation

2.1 Package Contents

1. S3 Accelerator card.
2. CD title or Software diskettes
3. This manual (optional).

2.2 Installing the Card

1. Turn off your computer.
2. Remove the cover of the computer per the owner's manual.
3. Install the card in one of the PCI bus slots.
4. Replace the cover.

2.3 Resolutions and colors supported:

All S3 Family PCI/AGP bus VGA cards are fully compatible VGA with the addition of Hi-Color and True Color modes depending on the amount of video memory stalled. The amount of memory needed to display various resolutions is shown below (Table 1,2,3)

2.3.1 S3 MX (260)

Resolution & Colors	BPP	Refresh Rate (HZ)	1MB	2MB	4MB
640x480-256c	8	60/72/75/85	✓	✓	✓
640x480-32Kc	15	60/75/85	✓	✓	✓

Table 3

3. Smart Installation

3.1 Put the Smart Installation CD in your CD-ROM

If your CDROM drive do not support Auto-insertion
Please run "D:\Sinstall\Sinstall.exe"
(D means the letter of your CDROM drive)

3.2 Click the **FLAG** or the **country name** to choose the language you preferred. Then Click the **Driver installation** button

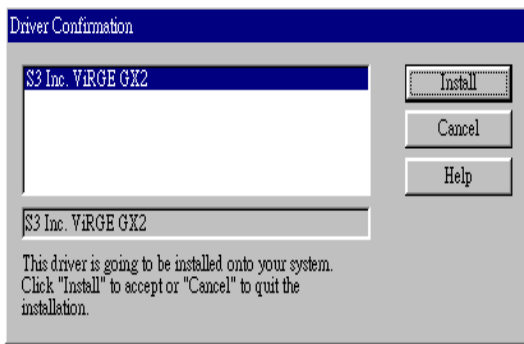

3.3 Comes up the **Confirm Installation** window.

If the information and drivers location is correct
Then Click **OK**, If you want to change drivers location,
Click **Browse** and give the new drivers location now
Then Click **OK**.

3.4 Now comes up the **Driver Confirmation** window

Click **Install** for installation

3.5 Installation already done, the default resolution has been set. you can change resolution under "display property" after system restarted.

4. Windows 95 & Windows 98 Setup

4.1 Installation and Setup

4.1.1 Windows 95

The Windows setup program installs and modifies all of the necessary files. Follow these steps to install the Windows 95 driver.

- Insert the "Window 95 Driver" Installation Diskette or DISC (CD Title Driver).
- Double click **Control Panel** icon under **My Computer** group.

- Double-click **Display** icon under **Control Panel** folder. You can also click the right mouse button anywhere on the desktop and select the Properties option from the pop-out menu.

- Choose **Settings** and Click **Change Display Type** button.

- Click **Change Adapter Type** button.

- Click the **Have Disk** button.

- Change directories and Select *******.INF**. Then click **OK**.
Diskette is **A:** or **B:** **WIN95** , Disc (CD Title) is **D:\drivers\S3\362\WIN95**
(**"A:"** or **"B:"**) → Diskette Drive **"D:"** → CD Drive **"362"** → VGA type)

- Select **S3 Inc. Trio3D/2X** (for SP362/SP368)
or **S3 Inc. ViRGE/MX** (for SP260)
or **S3 Inc. Savage3D** (for SP391)
driver from the models list and click **OK** button. If a message stating that one or more driver files is older than the files on the system respond **YES** to overwrite the files.
- Click the Close button and Apply button, and restart your computer.

4.1.2 Windows 98

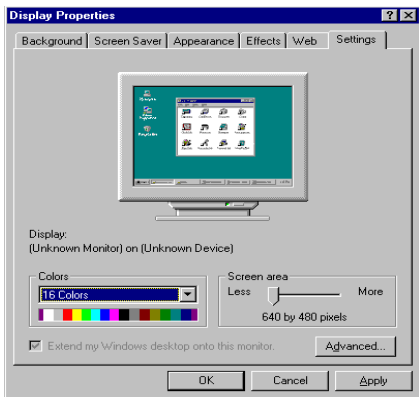

- Double Click **Control Panel** icon under **My Computer** group.

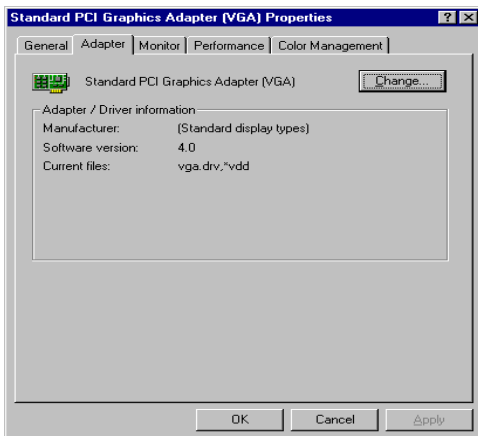

- Double-click **Display** icon under **Control Panel** folder. You can also click the right mouse button anywhere on the desktop and select the Properties option from the pop-out menu.

- Choose **Settings** and Click **Advanced...**

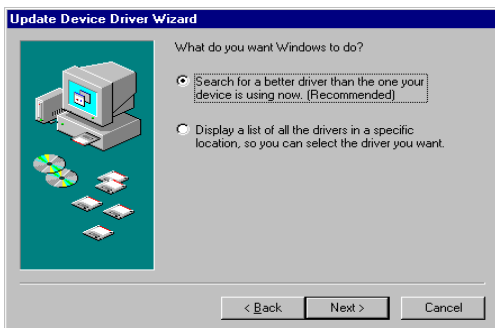

- Select **Adapter** from Properties window and click **Change**

- Then show **Update Device** window
Click **Next**

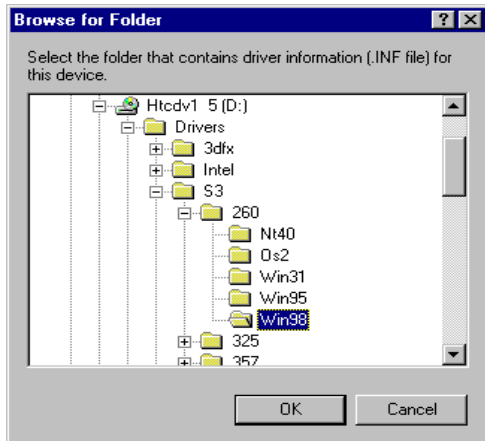

- Then show another **Update Device** window
Check **Search for a better.....**
Then click **Next**.

- Then comes up another **Update Device** window
Check **Specify a location** and click **Browse**

- Then comes up the **Browse for Folder** window
Select **D:\Drivers\S3\362\Win98**
Then select **OK**
(“D:”→CD Drive “362”→VGA type)

- Then come back the previous **Update Device Driver Wizard** window
Click **Next**

- Then comes up another **Update Device Driver Wizard** window
Select **Next**

- Then comes up the last **Update Device Driver Wizard** window
Select **Finish**

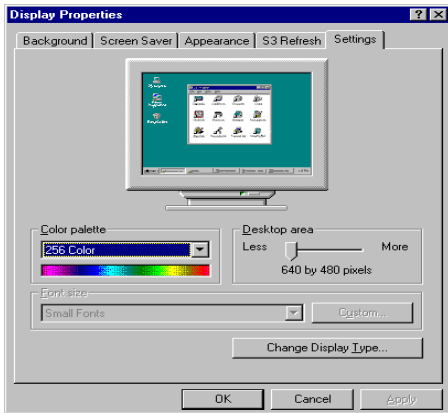

- Now comes up **System Settings Change** window
Click **YES** to restart the system.

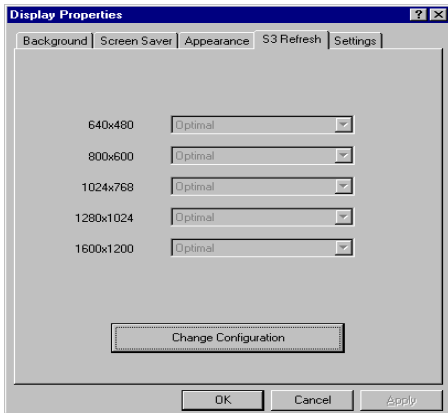

4.2 How to Change Color Depth and Resolution

- 1 Make sure that you have installed the **Windows95/98** Driver.
- 2 Click on the **Start** box in the lower left corner and proceed to **Control Panel**.
- 3 Inside the **Control panel** group, click on **Display** icon to open the **Display Properties** folder and select the **Setting table**
- 4 Click on the pull-down arrow from the **Color** palette area to select color depth or adjust the sliding bar to either **Less** or **More** from the **Desktop area**
- 5 Select **OK** to restart **system** and new color depth or the new resolution takes effect.

4.3 Change Refresh Rate

1. Make sure that you have installed the **Windows95 Driver**. Click on the **Start** box in the lower left corner and proceed to Setting, **Control Panel**
2. Inside the **Control panel** group , click on **Display** icon to open the **Display Properties** folder and select the **S3 Refresh table**
3. Click on the **Change Configuration** to change refresh rate
4. Select **OK** and new refresh rate takes effect

- Refresh Rate default is Optimal .
- If you change Refresh Rate from Optimal to another , you must be to restart Windows95

5. Windows NT 3.51, 4.0

The following steps describe how to install WIN NT 3.51 and 4.0 display drivers

1. Select **Control Panel** from the **Main** group.
2. Select the **Display** icon.
3. Select **Change Display Type**.
4. Select Change from the **Adapter Type** area.
5. Select **Other**.
6. Place the **Windows NT** Installation Disk or Disc (CD Title) into Drive. Click **OK**.
7. Select **Install** and click "**YES**" when the Installing Driver dialog box appears.
8. When the WINDOWS NT **Setup** dialog box appears select driver A or CD- ROM, and click "**Continue**".

A message appears stating that drivers were successfully installed. Click **OK**. Another message appears stating that the driver could not be restarted dynamically. Restart **Windows NT** to run the new driver. Click **OK**.

6. OS/2 Driver Setup

6.1 Installation Instructions

1. Open an OS/2 command prompt (windowed or full screen).
2. Insert the OS/2 Installation Diskette into the floppy drive or Disc into CD- ROM.
3. Change to the floppy drive (**A:** or **B:**) or Disc (**CD- ROM**) into which you have inserted the driver diskette or CD ROM. Verify that the diskette (Disc) is labeled "**S3 DRVS**". If it is not so labeled, then type label "**S3 DRVS**".
4. Type "**S3INST A: C:**" or "**S3INST E: C:**" and press "**Enter**" ("**A**" is the floppy driver, "**E**" is the CD ROM Driver, "**C**" is the HDD driver on which OS/2. 2.1 or OS/2 3.0 WARP is installed).
5. When prompted, exit the OS/2 command prompt, remove the floppy disk, and shut down and reboot the system.
6. Make sure you have all open data files saved before continuing the **S3 driver** installation.
7. Make sure Win-OS/2 session and all Seamless Windows applications are closed (Seamless applications as Windows applications that run on top of the **PM Desktop**).
8. Double click on the "**OS/2 System**" icon.
9. Double click on the "**System Setup**" icon.
10. Double click on the "**Display Driver Install**" icon.
11. When prompted by the Display Driver install dialog, select Primary Display and then click the **OK** button.
12. Select the "**32 Bit S3 Display Driver**" option from the Primary Display and then click the OK button.
13. Select the appropriate option from the Monitor Configuration/Selection Utility dialog, and click the **OK** button.
14. The Source Directory dialog will be displayed. Make sure the source directory is set to the location from which you are installing and select install.
15. The installation Program may pause and display prompts to overwrite certain files. Please answer **YES** for each file.
16. You will be given a message stating that you Must shut down and restart your system

for the changes to take effect "Click" the **OK** button.

17. Remove the driver diskette from the floppy drive and Shut down and reboot.

6.2 To Change Refresh Rate

1. Load and start OS/2 and Insert the "**OS/2 drive Installation**" diskette (Disc) into your diskette (CD- ROM) drive.
2. Go to DOS full screen.
3. Copy the "**Refresh.exe**" program in the **util** directory on the "**OS/2 drive installation**" diskette to your hard disk.
4. Start the refresh program and, using the mouse, specify the refresh rate desired for each resolution you may want to run. Note that you must have your mouse driver loaded.
5. Changes are not saved when OS/2 is restarted. Therefore, you will have to return the refresh for each new OS/2 session.

APPENDIX A - Specifications

A.1 Bus Type

64-bit AGP 1X bus SP260

64-bit AGP 2X bus SP391/SP362/SP368

A.2 Video Connector

VGA standard 15 pin analog RGB

S-Video or AV connector for output to TV (SP260/SP391 only)

MDR20 for LCD PANNEL Monitor connector (SP260 only)

A.3 Graphics Accelerator

- S3 MX or name as SP260
- S3 Trio3D 2X or name as SP362
- S3 Trio3D 2X+ or name as SP368
- S3 Savage 3D or name as SP391

A.4 Display Memory

- S3 M5 : 4 M byte SGRAM (Standard)
- S3 Trio3D 2X : 4 M byte SGRAM (Standard)
- S3 Trio3D 2X+ : 8 M byte SDRAM (Standard)
- S3 Savage 3D: 8 M byte SGRAM/SDRAM (Standard)

APPENDIX B - FCC Statement

Federal Communications Commission (FCC) Statement

RADIO FREQUENCY INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not install and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced Radio/TV technician for help.

Any special accessories needed for compliance must be specified in the instruction manual.

Warning: A welded-Type power cord is required in order to meet FCC emission limits and also to prevent interference to the nearby Radio and Television reception. It is essential that only the supplied power cord be used.

Use only shielded cables to connect I/O devices to this equipment.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.
