ReadMe File

Share must be loaded:

      Share.exe, which installs file-sharing and locking capabilities on your hard drive, must be loaded for this product to function properly. If you recieve an error message concerning **share.exe** you must include **share.exe** in your **config.sys** file and reboot your computer.

      The line below should be included in the **config.sys**:
          install=c:\dos\share.exe /F:5100 /L:500
