KENTROL QUICK START

1) From the File Manager or Program Manager run *SETUP.EXE*.

2) Allow the setup routine to install a Kentrol group and icon.

3) Read *KENTROL.WRI*.

4) Connect your radio to the serial port, and turn everything on.

5) Double-click on the Kentrol icon.

6) Choose "radio" in the new object dialog.

7) After the Tuner and Memories windows appear, save [File, Save As]'.

*TIP -- Accept the default filename "radio1.rad" to enable autoloading.

8) Create a new memory file [File, New, Memories] and save it.

9) Download [File, Download] your radio's memories to the file. Save it.

10) Enjoy.

UPGRADING FROM A PREVIOUS VERSION

Delete the existing *KENTROL..INI* and *KENTROL.GRP* files from your main Windows directory, delete *RADIO1.RAD* from the Kentrol directory, then follow the Quick Start instructions above.
