

## Sheet1

```
\s @REPEAT("-",@CELLPOINTER("width")-1){CALC}{HOME} {DOWN}  
@sum({UP}.{END}{UP})~
```

This macro will add up a column of numbers and as a bonus place a line under the column of numbers that is one less than the width of the column.

To use the macro place the cursor and the bottom of numbers you want to add and hold down the macro key (Alt on most computers) and press the "S" key.

If you combined this with another spreadsheet you will have to name the cell to the right of the \s to \s. To do this place the cursor on the \s and press slash (/), Range (R), Name (N), Labels (L), Right (R), and Enter. This will name the cell to the right of \s to \s.
