

Sheet1

- *---A macro to continuously HIDE columns
- *---Use the /Range Name Label Right {End} {Down} <ENTER> to define the range names in this column (starts with the \Z macro name)
- *---Hold the <ALT> key and press <Z> to activate the macro
- *---Place the cell pointer at least one column apart of the columns you plan to hide. When the macro is activated the cell pointer position is recorded, hiding the column cause the managers to loose track and beep few times.
