

# Daily Wisdom

Version 1.0

Rick Spurlock (c) 1991

## Introduction

**"Thy Word is a lamp unto my feet..." (Psalm 119:105)**

**Daily Wisdom** is a simple **Windows 3.0** "file-viewer" that displays a daily Scripture passage. When called from **Windows'** "win.ini" file, it will start a user's day at the computer with the blessing of the written Word. A supplemental disk is available to registered users that gives the ability to add other passages from "compressed libraries" to the display. Because of copyright restrictions, **Daily Wisdom** is distributed with the text of **Proverbs**, in the King James Version of the Bible only. Although it may not be distributed with any other copyrighted versions of the Bible; **Daily Wisdom's** design allows other Bible versions to be copied into it by the "end-user." **Daily Wisdom** is released as "shareware." This means it is copyrighted, but may be freely copied and distributed (with all files - unaltered) with the user registering the software if he/she likes it and uses it. The registration fee is \$5. Registered users are entitled to free uploaded updates, and for \$3 (for shipping and handling) may obtain the supplemental disk with other Scripture "libraries." Included in the supplemental disk is a **Windows** utility that makes **Daily Wisdom** libraries (for making libraries from other versions of the Bible).

## Requirements

**Windows 3.0** (or higher) and a 80286 (or higher) computer.

## Installation

If the **Install** program is used, installation is automatic. **Daily Wisdom** will be set up in a new program group called "Misc," from which it can be easily moved anywhere in the program manager. To install without the use of the Install program, the file "DAYFILES.EXE" should be moved to the drive you want to install on, and executed. This will decompress the files into a directory named "DAILY". With **Windows 3.0** and **3.0a**, The file named "VBRUN100.DLL" should be moved into your **Windows** directory (when **Windows 3.1** is released, it may have this file already in your **Windows'** directory.) All the other files should be moved into one directory (example: c:\daily). To install **Daily Wisdom** so that it automatically starts upon entering **Windows**, call up the "win.ini" file located in your **Windows'** directory (an easy way is from **File Manager**: just click on "windows\system\sysedit.exe"). In the **Run =** line, add [path statement where **Daily Wisdom** is stored] + daily.exe (example: run = c:\daily\daily.exe).

## **Passage Scroll Window**

This works like any other **Windows** text viewer - simply scroll through the passage with the scrollbar, or use **Page Up / Page Down**.

## **Menu Items**

### **File:**

#### **Date Change**

Changes the system date. If the date in **Daily Wisdom** is not correct, your system date needs to be reset.

#### **Other Passages**

This allows you the option of reading any other of the 31 passages in the current library. The passage number corresponds to the day of the month. In months where there are only 30 days (or 28/29), you may want to use this option to view the last 1 or 2 passages in a library.

#### **Libraries**

This allows you access to additional passages of the Bible. Only **Proverbs** is included with the "shareware distributed" version of **Daily Wisdom**, so this option requires the supplemental disk (\$3 for registered users). The libraries are in "compressed" form to save on disk space. Only one library may be open at a time. To "unpack" a library, simply select it (double-click with the mouse or select + Load), and it will automatically "unpack" and load the passage for the day.

#### **Exit**

Does just that.

### **Edit:**

#### **Copy Selected Text**

Mark the text you would like to export and then click on this option. You can then paste the text into any other program that accepts text from the **Windows** clipboard.

### **Help:**

#### **Instructions**

Calls up **Windows' Write**, and this manual.

#### **About**

The "about box."

## **Using Bible Other Versions:**

If you have the supplemental disk of libraries, consult its documentation for using the library-compression utility. If you only have **Proverbs**, you will need any Bible program that saves selected passages into text files. You can load the text for each chapter of Proverbs into its own file named "daily(chapter number).txt". Example: **Proverbs 1** should be saved into a file that you name "daily1.txt" Editing of these files can be done with any text editor. If your Bible program gives formatting options; ideally, text should be saved to files with the column width set to 80 characters. This will provide a consistent look to each day's passage. If there are no line breaks, **Daily Wisdom** will automatically wrap.

PLEASE don't distribute this program with any copyrighted versions of the Bible. Most Bible programs (for which you hold a license) permit saving copyrighted text for personal purposes only. This author is not responsible for copyright violations by the user. As far as programs to get your text from, Online Bible is an EXCELLENT study program. It is currently in version 5.0, and has a NIV capability with a royalty charge (the shareware version is KJV). Quick Verse 2.0 (Parsons Technology) is another excellent program. They have many translation options including combinations. This was the program used for the text in **Daily Wisdom**. Both of the above programs offer Hebrew and Greek transliterations.

### **File List**

These are the files that are distributed with **Daily Wisdom**:

- readme.txt - installation information
- vbrun100.dll - dynamic link library
- install.exe - **Daily Wisdom** installation program
- dayfiles.exe - **Daily Wisdom** files in self-extracting archive

Files contained in dayfiles.exe

- daily.exe - program executable file
- rh.alt - program file
- daily.wri - this file, in **Windows Write** format
- daily\*.txt (31) - ASCII files with scripture passages

### **Copyright**

The author releases **Daily Wisdom** as shareware. Although all rights are reserved, it may be freely copied and distributed provided it is not altered, and it is distributed with all the files named in the file list. As shareware, the user is responsible to register **Daily Wisdom** if he/she likes it and uses it. It is not free software. The author is not liable for any damage caused by the use of this program (what damage - I can't imagine).

**Windows** and **Write** are trademarks of Microsoft.

### **Conclusion**

I hope that this program will be of benefit. I would hope that it is merely an additional opportunity for the user to read the Word. Sometimes I need to be reminded what comes first - this program is a reminder to me, hopefully it will be a reminder to you. God bless you as you seek His Kingdom first...

Mat 16:24 -26 (NKJV) Then Jesus said to His disciples, "If anyone desires to come after Me, let him deny himself, and take up his cross, and follow Me. "For whoever desires to save his life will lose it, but whoever loses his life for My sake will find it. "For what profit is it to a man if he gains the whole world, and loses his own soul? Or what will a man give in exchange for his soul?"

### **Questions and Suggestions**

I readily welcome comments and suggestions on this software. Any future version will be as a result of user's suggestions. This is an extremely simple program, but if you have problems or questions, feel free to contact me.

### **Registration**

Send \$5 to:

Rick Spurlock  
4844 Truesdale Place  
Charlotte, NC 28277

For the supplemental disk, include \$3 and specify disk size. 5.25" (1.2 megabyte) or 3.5" (720 K)
