

My Card Collection is a Windows based card organizer. It allows card collectors to maintain collections of Single Cards, Complete Sets, as well as assisting you in maintaining Wanted Card Lists, and Missing Card Lists.

My Card Collection is a fully functional shareware program that can organize any group of individual single cards, or any set of cards. By Registering and ordering more sets, you can extend My Card Collection's ability to identify your cards. The un-registered version of My Card Collection comes complete with info to identify any card in 2 particular sets: the 1993 Topps Baseball Regular, and the 1975 Topps Baseball Regular sets. This will allow you to see first hand the capabilities of My Card Collection, and I encourage you to order additional sets.

NOTE: Before you can run My Card Collection, there are two things you must do:

- 1 You should add the following line to the beginning of your AUTOEXEC.BAT file:

```
SHARE /L:500
```

This will automatically run the SHARE utility, which MUST be done in order to use My Card Collection.

- 2 You must have a Default Printer installed for Windows. This is a requirement of the Crystal Reports for Windows, which are used to produce the reports in My Card Collection.

- [Installation from MCC.ZIP](#)
- [Installation from SETUP Diskette](#)

- [System Requirements](#)
- [Software Requirements](#)
- [Product Support](#)
- [Packing List](#)

Installation from MCC.ZIP

- 1 Copy MCC.ZIP into any directory you choose.
- 2 Unzip MCC.ZIP using an unZIPping utility.
- 3 My Card Collection requires VBRUN300.DLL. Make sure VBRUN300.DLL is located in your WINDOWS/SYSTEM directory. If you do not have VBRUN300.DLL, download it from an online service or BBS. (NOTE: VBRUN300.DLL is NOT included in MCC.ZIP)
- 4 My Card Collection requires SHARE.EXE to be executed prior to using it. Add the following line to your AUTOEXEC.BAT file:

```
SHARE /L:500
```

- 5 From Windows, run MCC.EXE in the My Card Collection directory you copied/unzipped MCC.ZIP into.

Install from SETUP Diskette

- 1 Start Microsoft Windows 3.1 or later.
- 2 Insert MCC Setup Disk #1 into drive 'A'. (or drive 'B' if appropriate)
- 3 Run ?:\Setup. Follow the directions as you're prompted. (? stands for the floppy drive)
- 4 From Windows, run MCC.EXE in the My Card Collection directory, or simply double-click on the My Card Collection icon.
