

The Startup File List

- **Enabling/Disabling Startup Files:** Clicking on a startup file in Conflict Catcher will toggle it between enabled and disabled. The highlighted startup files are enabled.
- **Locking Startup Files:** To lock on a startup file permanently, hold down the shift key while clicking on the startup file. A lock will appear to the right of the startup file indicating its new status. Repeat the procedure to unlock a file.
- **File Information:** Option-Clicking a startup file will display important information.
- **Opening Startup Files:** Command-Clicking a startup file will open it if you are using Conflict Catcher from the Finder.
